

TSWG Q&A  
4/23/20

1. Do the timestamps captured in OATS have to equal the timestamps captured in CAT? For example, if a firm's system captures nanoseconds, but timestamps are reported to OATS in milliseconds, should the timestamp reported to CAT be captured in nanoseconds?
2. Is the *ltidEffectiveDate* the date when the LTID was assigned by the SEC or the date that the clearing firm was provided the LTID?
3. What is the *ltidEndDate*?
4. Are regulators expecting complete accuracy with respect to the *ltidEndReason*?
